

SWIFT WIRELESS AV BASE

WAV-CRL, WAV-CWL, WAV-RL, and WAV-WL

General

SWIFT® AV bases WAV-CRL, WAV-CWL, WAV-RL, and WAV-WL are intended for use with compatible System Sensor L-Series AV notification appliances to meet a comprehensive range of notification requirements. The AV Base provides power for the audio and visual signals and supports wireless communication with the Fire Alarm Control Panel (FACP). The L-Series AV notification appliance is mounted directly to the wireless AV base allowing flexibility in color, placement and signal output.

Power is supplied through two sets of 4 batteries – one set provides power for wireless communication, and the other provides power for the notification appliance's audio and/or visual signal. Battery life of the wireless portion is UL listed for at least 2 years. Battery life for the AV set of batteries depends upon the activation time and output level of the audio or visual signal. The AV base boosts output voltage to support 24 VDC options on connected devices.

The SWIFT synchronization module (W-SYNC) provides audio and visual synchronization between SWIFT notification appliances and System Sensor wired notification appliances supporting the integrated wired-wireless solution. The module only operates with notification appliances that use the System Sensor synchronization protocol. Synchronization of the SWIFT notification appliances within a single mesh network is inherent in the wireless system so a wireless synchronization module is not needed. The W-SYNC also provides wireless control and monitoring of a Notification Appliance Circuit (NAC) expander or power supply. The wireless synchronization module operates from 24 V power with supplemental battery support and communicates through the mesh network with the gateway and Fire Alarm Control Panel (FACP).

SWIFT System Overview

The SWIFT Smart Wireless Integrated Fire Technology wireless system offers intelligent (addressable) devices which provide secure, reliable communication with the FACP across a Class A mesh network. Wireless devices create an opportunity for applications where it is costly (concrete walls/ceilings, buried wires), obtrusive (surface mount conduit), or possibly dangerous (asbestos) to use traditional wired devices. It allows fast installation for time-critical situations and provides the flexibility to add wireless onto wired systems for retrofit installations. Both wired and wireless devices can be present on the same FACP for an integrated solution.

FEATURES & BENEFITS

- Converts compatible System Sensor L-Series AV appliances to addressable wireless AV appliances
- Wireless installation
- Class A mesh network
- Commercial applications
- Listed to:
 - UL 464
 - UL 1638
 - UL 1971
- Frequency hopping
- Bi-Directional Communications

The mesh network within the SWIFT system creates a child-parent relationship between the devices so that each device has two parents providing a second path for communications on every device. If one device can no longer operate for any reason, the rest of the devices can still communicate with each other, directly or through one or more intermediate devices. Once an initial mesh network is formed, mesh restructuring automatically occurs to find the strongest paths possible within the network.

The SWIFT system also engages frequency hopping to prevent system interference whether intentional or accidental. Each device complies with part 15 of the FCC rules: 1) The device may not cause harmful interference and 2) The device must accept any interference received including interference that may cause undesired operation.

COMPATIBLE EQUIPMENT

Note: ULC-listed models have all required languages.

Model (UL listed)	Model (ULC listed)	Description
CHRL	CHRLA*	Chime Red Wall
CHSCRL	CHSCRLA*	Chime/Strobe Red Ceiling
	CHSCRLA-E	Chime/Strobe Red Ceiling, English
	CHSCRLA-F	Chime/Strobe Red Ceiling, French
CHSCWL	CHSCWLA*	Chime Strobe White Ceiling
	CHSCWLA-E	Chime/Strobe White Ceiling, English
	CHSCWLA-F	Chime/Strobe White Ceiling, French
CHSRL	CHSRLA*	Chime Strobe Red Wall
	CHSRLA-E	Chime/Strobe Red Wall, English
	CHSRLA-F	Chime/Strobe Red Wall, French
CHSWL	CHSWLA	Chime Strobe White Wall

Note: Battery life will decrease using continuous tone or other coded patterns and under non-ambient environmental conditions.

SWIFT WIRELESS AV BASE TECHNICAL SPECIFICATIONS

PHYSICAL/OPERATING SPECIFICATIONS

Dimensions (Ceiling): Diameter 7.4" (19 cm);
Depth 1.6" (4 cm)

Weight (Ceiling): 20.0 oz (567 g) installed with 8
batteries

Dimensions (Wall): Height 6" (15 cm); Width
5.1" (13 cm); Depth 1.6" (4 cm)

Weight (Wall): 17.6 oz (499 g) installed with 8
batteries

ELECTRICAL SPECIFICATIONS

RF Operating Voltage Range: 3.3 VDC

RF Maximum Current Draw: 5 mA (LED On)

RF Operating Voltage: 1.2 VDC

AV Output, Operating Voltage: 24 VDC
(nominal)

AV Maximum Standby Current: 6.5 mA

AV Maximum Alarm Current: 550 mA

Standby Current: 210 μ A @ 3.3 VDC (LED blink
enabled)

Maximum Transmit RF Power: 17 dBm

Radio Frequency Range: 902-928 MHz

Operating Humidity Range: 10% to 93%
Relative Humidity, Non-condensing

Operating Temperature Range: 32°F to 120°F
(0°C to 49°C)

Battery Type: 8 Panasonic® CR123A or 8
Duracell® DL123A

Battery Life: RF batteries: 2 year minimum.
AV batteries: See Battery Life table.

Battery Replacement: Replace during annual
maintenance or when TROUBLE BATTERY LOW
displays.

ORDERING INFORMATION

W-BATCART: Wireless battery cartridge 10-pack

WAV-CRL: Wireless AV base, ceiling, red

WAV-CWL: Wireless AV base, ceiling, white

WAV-RL*: Wireless AV base, wall, red

WAV-WL*: Wireless AV base, wall, white

W-SYNC: Wireless sync module

*NOTE: WAV-RL & WAV-WL are compatible with wall-mount
L-Series devices manufactured after 26 April 2019 (date
code 9045 and later). WAV-CRL and WAV-CWL are
compatible with all ceiling-mount L-Series devices.

STANDARDS

The SWIFT WIRELESS AV BASE WAV-CRL, WAV-
CWL, WAV-RL, and WAV-WL is designed to
comply with the following standards:

UL 864 9th Edition and 10th edition

NFPA 72

AGENCY LISTINGS AND APPROVALS

These listings and approvals apply to the
modules specified in this document. In some
cases, certain modules or applications may not
be listed by certain approval agencies, or listing
may be in process. Consult the factory for the
latest listing status.
